WORK EXPERIENCE

Senior Product Associate at athenahealth

- Led scrum team as Product Owner to ideate and design a rules-based scheduling platform that streamlined scheduling appointments for doctors and their patients easier, increasing monthly new patient volume by 21%.
- Facilitated user feedback sessions with clients to identify functional gaps in user experience, and implement solutions to improve user workflows.
- Designed API services for scheduling platform to deliver real-time, accurate results of doctors' availability.
- Nominated for 2016 Owl Award, recognizing a team for their excellence in the execution of a significant project supporting business strategy, while preserving and promoting the cultural value of teamwork.
- Delivered new functionality for scheduling product by bridging gap between business stakeholders, software developers, and UX designers.
